Molecular and Cellular Biochemistry:

An International Journal for Chemical Biology in Health and Disease

CONTENTS VOLUME 248, Nos. 1 & 2, June 2003

M. Reale, C. Di Giulio, M. Cacchio, R.C. Barbacane, A. Grilli, M. Felaco, G. Bianchi, M. Di Gioacchino and P. Conti: Oxygen supply modulates MCP-1 release in monocytes from young and aged rats: Decrease of MCP-1 transcription and translation is age-related 1–6

C.E. Draper, J. Singh and E. Adeghate: Effects of age on morphology, protein synthesis and secretagogue-evoked secretory responses in the rat lacrimal gland 7–16

J.L. Kang, H.S. Lee, I.S. Pack, K.C. Hur and V. Castranova: Phosphoinositide 3-kinase activity leads to silica-induced NF-κB activation through interacting with tyrosine-phosphorylated IκB-α and contributing to tyrosine phosphorylation of p65 NF-κB 17–24

R. Rao and B.R. Lokesh: Nutritional evaluation of structured lipid containing omega 6 fatty acid synthesized from coconut oil in rats 25–33

P. Varalakshmi, S. Sandhya and K.P. Malarkodi: Evaluation of the effect of lipoic acid administered along with gentamicin in rats rendered bacteremic 35–40

P. Kaplan, E. Babusikova, J. Lehotsky and D. Dobrota: Free radical-induced protein modification and inhibition of Ca^{2+}-ATPase of cardiac sarcoplasmic reticulum 41–47

A. Galicka, S. Wołczynski, A. Gindzieński, A. Surażyński and J. Pałka: Gly511 to Ser substitution in the *COL1A1* gene in osteogenesis imperfecta type III patient with increased turnover of collagen 49–56

M. Kawai, J. Chen, C.Y.S. Cheung and T.K.H. Chang: Transcript profiling of cytochrome P450 genes in HL-60 human leukemic cells: Upregulation of CYP1B1 by all-*trans*-retinoic acid 57–65

J.K. Vishwanatha, R. Swinney and A.G. Banerjee: Modulation of annexin I and cyclooxygenase-2 in smokeless tobacco-induced inflammation and oral cancer 67–75

E. Do, E. Taira, Y. Irie, Y. Gan, H. Tanaka, C.-H. Kuo and N. Miki: Molecular cloning and characterization of rKAB1, which interacts with KARP-1, localizes in the nucleus and protects cells against oxidative death 77–83

S. Di Meglio, M. Denegri, S. Vallefuoco, F. Tramontano, A.I. Scovassi and P. Quesada: Poly(ADPR) polymerase-1 and poly (ADPR) glycohydrolase level and distribution in differentiating rat germinal cells 85–91

Short communications

I.V. Smirnova and M.L. Pall: Elevated levels of protein carbonyls in sera of chronic fatigue syndrome patients 93–95

L. Riccalton-Banks, R. Bhandari, J. Fry and K.M. Shakesheff: A simple method for the simultaneous isolation of stellate cells and hepatocytes from rat liver tissue 97–102

Focussed Section on Cardiac Metabolism
Guest editors: Drs. Naoki Makino and Makoto Nagano

Review

K. Hirano, D.N. Derkach, M. Hirano, J. Nishimura and H. Kanaide: Protein kinase network in the regulation of phosphorylation and dephosphorylation of smooth muscle myosin light chain 105–114

T. Yanazume, T. Morimoto, H. Wada, T. Kawamura and K. Hasegawa: Biological role of p300 in cardiac myocytes 115–119

S. Takahashi, J. Sakai, T. Fujino, I. Miyamori and T.T. Yamamoto: The very low density lipoprotein (VLDL) receptor – a peripheral lipoprotein receptor for remnant lipoproteins into fatty acid active tissues 121–127

K. Takeuchi, H. Watanabe, Q.-K. Tran, M. Ozeki, A. Uehara, H. Katoh, H. Satoh, H. Terada, K. Ohashi and H. Hayashi: Effects of cytochrome P450 inhibitors on agonist-induced Ca^{2+} responses and production of NO and PGI_2 in vascular endothelial cells 129–134

E. Tsujii, H. Tanaka, M. Oyamada, K. Fujita, T. Hamamoto and T. Takamatsu: *In situ* visualization of the intracellular Ca^{2+} dynamics at the border of the acute myocardial infarct 135–139

T. Matsumoto, T. Miura, T. Miki, Y. Nishino, Y. Nakamura and K. Shimamoto: Does enhanced expression of the NA^{+}-Ca^{2+} exchanger increase myocardial vulnerability to ischemia/reperfusion injury in rabbit hearts? 141–147

K. Tanonaka, W. Toga, M. Takahashi, K.-i. Kawana, Y. Miyamoto, H. Yoshida and S. Takeo: Hsp70 attenuates hypoxia/reoxygenation-induced activation of poly(ADP-ribose) synthetase in the nucleus of adult rat cardiomyocytes 149–155
M. Higuchi, K. Hirata, A. Yamashita and K. Nishi: Effects of epinephrine on underperfusion-reperfusion injuries in diabetic and non-diabetic rat hearts 157–163
T. Sugawara, S. Fujii, A.K.M.T. Zaman, D. Goto, T. Furumoto, S. Imagawa, J. Dong, I. Sakuma, S. Jesmin, H. Togashi, M. Yoshioka, T. Koyama and A. Kitabatake: Coronary capillary network remodeling and hypofibrinolysis in aged obese diabetic rats: Implications for increased myocardial vulnerability to ischemia 165–170
H. Okawa, H. Horimoto, S. Mieno, Y. Nomura, M. Yoshida and S. Sasaki: Preischemic infusion of alpha-human atrial natriuretic peptide elicits myoprotective effects against ischemia reperfusion in isolated rat hearts 171–177
Y. Nomura, H. Horimoto, S. Mieno, K.-i. Nakahara, H. Okawa, M. Yoshida and S. Sasaki: Repetitive preischemic infusion of phosphodiesterase III inhibitor olprinone elicits cardioprotective effects in the failing heart after myocardial infarction 179–184
Z. Yuan, C. Kishimoto, K. Shioji, H. Nakamura, J. Yodoi and S. Sasayama: Temocapril treatment ameliorates autoimmune myocarditis associated with enhanced cardiomyocyte thioredoxin expression 185–192
M. Nimata, C. Kishimoto, K. Shioji, K. Ishizaki, S. Kitaguchi, T. Hashimoto, N. Nagata and C. Kawai: Upregulation of redox-regulating protein, thioredoxin, in endomyocardial biopsy samples of patients with myocarditis and cardiomyopathies 193–196
C. Shikata, A. Takeda and N. Takeda: Effect of an ACE inhibitor and an AT1 receptor antagonist on cardiac hypertrophy 197–202
K. Ohkura, J.-D. Lee, H. Shimizu, A. Nakano, H. Uzui, M. Horikoshi, Y. Fujibayashi, Y. Yonekura and T. Ueda: Mitochondrials complex I activity is reduced in latent adriamycin-induced cardiomyopathy of rat 203–208
M. Watanabe and T. Okada: Lysophosphatidylcholine-induced myocardial damage is inhibited by pretreatment with poloxamer 188 in isolated rat heart 209–215
K. Iizuka, N. Morita, T. Nagai, A. Hanada, K. Okita, K. Yonezawa, T. Murakami, A. Kitabatake and H. Kawaguchi: A 44-kDa of protein identical to the N-terminal amino acid sequence of MCT1 in human circulation 217–223

Erratum
T. Kitano, N. Nisimaru, E. Shibata, H. Iwasaka, T. Noguchi and I. Yokoi: Monocarboxylates and glucose utilization as energy substrates in rat brain slices under selective glial poisoning – a ^{31}P NMR study 225
